Please ask at reception if unsure whether you qualify for free treatment.

COSMETIC OPTIONS

Crowns and Bridges

Unightly teeth can be covered with crowns and spaces between teeth can be filled using bridges. Advances in technology allow these teeth to appear more natural and black lines around gum margins are less likely to occur.

Porcelain Veneers

Veneers provide a wafer thin covering to hide discolouration on teeth and close unsightly gaps with little work being needed on the tooth itself.

Dentures

We offer a full range of denture options to help achieve the most natural results.

Tooth Whitening – Enlighten

This is a highly effective procedure to lighten the colour of your teeth.

White Fillings

Unightly mercury fillings can now be replaced by natural coloured fillings to improve the look of your smile.

Implants

Implants are a permanent, natural replacement for missing teeth or dentures. They can look, feel and be as robust as your natural teeth.

Invisalign® (tooth straightening)

Invisalign® is the invisible way to straighten teeth using a series of custom made, nearly undetectable clear aligners.

Facial Aesthetics

We can help you to reduce the signs of ageing and improve your facial appearance. The results are a younger, fresher you.

- **Facial Line Softening** using Botox®
- **Dermal Fillers** using Restylane™
